What Makes Us Different ? De La Rosa 613 Wines Are VEGAN!

The majority of wine consumers are unaware that wine, although made from grapes, may have been prepared using plastics, gluten and even animal-derived products. During the winemaking process, the liquid is filtered through substances called "fining agents". This process is used to remove protein, yeast, cloudiness, and "off flavors and colorings". Popular animal-derived fining agents used in the production of wine can include anything from animal blood and bone marrow, casein (milk protein), chitin (fiber from crustacean shells), egg albumen (derived from egg whites), fish oil, gelatin (protein from boiling animal parts), isinglass (gelatin from fish bladder membranes), PVPP (plastic) and even hydrolyzed gluten.

We, at **De La Rosa Vineyards**, do not use any of these types of fining agents. We are Truly Vegan !

De La Rosa Vineyards wines are Organic, Kosher, Vegan, Gluten-Free GMO-Free & Bio-Certified. Our grapes are grown on the sunny hills of the wine growing area near "Lake Neusiedl" (east of Vienna, next to the Hungarian border) and are strictly supervised by Oberrabbiner A.Y. Schwartz of Vienna to ensure the highest level of Kashrus.

A portion of profits go to the "Rescue The Children Fund" to aid abused children through the Lev Avraham Foundation.
